DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, drawn to a method for modifying plant growth and development, comprising introducing a genetic modification in said plant, or a plant produced by said method.

Group II, claim(s) 11-13, 19, 21-24 drawn to a DNA construct comprising a nucleic acid sequence encoding a metallothionein protein, or use of a nucleic acid sequence encoding a metallothionein protein.

Group III, claim(s) 14-18, drawn to a transgenic plant and a method of making said transgenic plant comprising a nucleic acid sequence encoding a metallothionein protein.

Group IV, claim 20, drawn to use of a metallothionein protein and homologues, derivatives and active fragments.

The inventions listed as Group I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-IV appear to be a nucleic acid sequence encoding a metallothionein protein. However, Town et al. (GenBank Sequence Accession No. NM_111773, Published August 20, 2002) teach a nucleotide sequence encoding a metallothionein protein.

Therefore, the technical feature linking the inventions of Groups I-IV does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

Accordingly, Groups I-IV are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

Art Unit: 1638

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
